

MOBOLIZE A SMART INVESTMENT

THE MOBOLIZE SOLUTION

Mobolize provides enterprise application optimization for Microsoft SharePoint® by delivering maximum application responsiveness, seamless in-the-browser offline access, and a centralized management console that includes extensive reporting to monitor user activity, application performance, and return on investment.

Our unique solution approach extends, enhances and accelerates the SharePoint experience through client-based software that is agnostic to how SharePoint is deployed or customized. There are no servers to install, no modifications to SharePoint, and no training program needed with a seamless integration for both the IT staff and end users.

DOES MOBOLIZE MAKE SENSE FOR MY ORGANIZATION?

Mobolize is designed for organizations of all sizes that utilize online applications like SharePoint as primary productivity and collaboration tools for employees. In order to maintain high employee productivity, these applications must always be accessible and responsive to employees in the headquarter location, at remote offices or when on the road.

Not only does Mobolize allow offline access to the complete SharePoint application, it also significantly boosts the responsiveness of SharePoint when connected through the firewall. Mobolize is finally the solution to the user complaint heard too often – “SharePoint is too slow!”

THE MOBOLIZE EQUATION

As online applications become more widely used, so too is an organization’s dependence on connectivity and distance. Both public and private cloud applications require the user to have a fast connection and proximity to the datacenter. Imagine eliminating this dependency with a software solution that reduces employee aggravation, improves productivity when online as well as offline, and requires only a minimal investment compared to other solutions on the market. Here are a few financial benefits (tangible and intangible) to calculate and consider when considering Mobolize:

Immediate Cost Benefits

- *No hardware*
Significant savings over hardware-based acceleration solutions with client-based software
- *Reduced network congestion*
Major reduction on network traffic and bandwidth requirements with caching
- *Reduced software maintenance and/or support*
Cost savings realized due to fewer upgrades, fixes, or enhancements required for software maintenance
- *Unprecedented application visibility and management*
Optimize application availability, performance, and return on investment with real-time and historical reporting
- *Lower employee support and training requirements*
Avoid employee training and Help Desk support with a seamless in-the-browser experience

Long-term Cost Benefits

- *Productivity savings*
Value of reduced effort spent by IT staff or employees to accomplish same tasks without Mobolize
- *Improved employee satisfaction*
Perceived or real improvements in user satisfaction with improved information access
- *Improved information*
Improved decision-making that results from having continuous access to information, often leading to productivity gains
